OBJECTIVES

Become a MEAN stack developer. I found my passion in JS frameworks and languages and I really like working with them. I also think I can be good in that domain. I've already enrolled for many courses online to perfect my training and I don't plan on stopping there.

For the long term I want to work with a team I feel comfortable with and in a field that reflects my values.

I hope working with you will help me reach my goal and I can help you reach yours.

SKILLS/ASSETS

- PHP, JS, SQL, ...
- React, Angular
- French, English, Spanish
- Communication
- Punctuality
- Friendly

WORK EXPERIENCE

Community Volunteer – AMO C.A.R.S.

2018 - 2019

- Great experience where I was helping young people with homework after school. It taught me a lot about communication as well as patience and how to help others learn.

Student Job – Quick

May 2018 – Sept. 2018

- It might not seem much, but working at the Quick restaurant taught me to work under pressure, especially during rush hours.

Phone Operator – ONG Conseil

Dec. 2017 – Mar. 2018

- At ONG Conseil I learned to listen to people's issues as well as to communicate with them.

Student Job – Delhaize and Carrefour

2012 - 2018

- I have worked in various positions in different stores, I did bakery, I did cashier, I did restock, I helped customers, help with the inventory... I was always a good worker, and I learned to work in various conditions and to always put on a good attitude.

Although those are not jobs related to what I want to do now, they did all taught me different values. Some I learned and some I reinforced. And they helped me become who I am today and realize who I want to become as well.

EDUCATION

Web Development – EPFC Brussels

2019 – 2021

Two years degree in Web Development. Finished 1st grade with 86% average.

Online Courses – OpenClassrooms & Udemy

2020

- Angular : 20 hours* online course on the Angular framework from OpenClassrooms.
- Angular : 10 hours* complementary course on Angular version 10 from Udemy.
- React : 40 hours* online course including Hooks, Routers, Redux and much more.

*Those hours do not reflect the total time spent but the video time. Those courses included homework and so on so they were obviously much longer. They are also linked in my LinkedIn profile.

IT management/Paul Lambin Institute

2013 - 2017

Unfinished bachelor's degree due to personal issues but many skills and knowledge acquired.

High School/Dames de Marie

2005 – 2011

Higher secondary education, in science section.
